PROFESSIONAL SUMMARY

Java Developer with 2 years of professional experience in designing and developing scalable web applications using Java, Spring Boot, REST APIs, and React. Skilled in backend development, MySQL, Redis, HTML, CSS, and Tailwind CSS, with hands-on experience in RESTful API integration, Redis caching, and AWS S3 cloud storage. Experienced with Git, GitHub, Maven, Jenkins, CI/CD pipelines, Elasticsearch, Kibana, and Jira in Agile development environments. Strong focus on writing clean, maintainable, and reliable code while delivering scalable and efficient solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL
- **Backend:** Spring Boot, REST APIs, Redis Caching
- **Frontend:** React, HTML, CSS
- **Databases:** MySQL, Redis
- **Cloud:** AWS S3
- **DevOps and CI/CD:** Jenkins, Maven, Continuous Integration, Continuous Deployment (CI/CD)
- **Monitoring and Debugging:** Elasticsearch, Kibana, Log Analysis
- **Version Control:** Git, GitHub
- **Project Management and Methodology:** Jira, Agile

PROFESSIONAL EXPERIENCE

Software Engineer | IVY COMPTECH

September 2022– November 2024

- Built and maintained scalable backend services for a virtual football betting platform, supporting 40% growth in daily bet volume with no service degradation.
- Monitored errors and exceptions using Elasticsearch, resulting in a 30% surge in platform stability, including a 35% reduction in recurring production errors.
- Streamlined CI/CD processes with Jenkins, automating deployment workflows and reducing deployment time by 60%.
- Debugged and resolved performance bottlenecks using Kibana log analysis, improving API response time by 30%.
- Actively involved in User Acceptance Testing (UAT) fixes for market features, contributing to a 20% faster go-to-market time, with a 90% first-pass UAT fix rate.

KEY PROJECTS:

Virtual Football Betting System

- Created and configured market templates to support different betting markets, rules, and transaction requirements.
- Monitored and troubleshooted production issues using Elasticsearch and Kibana, ensuring system stability and reliable service operations.
- Performed weekend production monitoring and validated application behavior, feeds, market data, and exceptions before the start of the weekly cycle.
- Supported development and testing activities by deploying application changes across development environments and validating fixes before production release.
- Upgraded backend services from an older Java version to Java 17, refactoring deprecated APIs and updating dependencies and build configurations.

Other Sports — Basketball, Ice Hockey & Darts

- Developed backend services to support betting operations across Basketball, Ice Hockey, and Darts markets.
- Implemented reusable market templates to handle sport-specific betting rules, configurations, and transaction workflows.
- Authored JUnit test suites covering odds validation, settlement rules, and edge cases, achieving 90%+ code coverage and cutting regression defects by ~40% during UAT and new market rollout.
- Set up Redis caching and uploaded event data to AWS S3 buckets for storage and retrieval.
- Collaborated with QA and business teams to resolve defects, implement UAT changes, and deliver new market features.

EDUCATION

Bachelor of Engineering in Computer Science

Info Institute of Engineering | Graduated: 2022

CERTIFICATIONS

- Full-Stack Web Development Certification
- Mastering AI Technologies

VOLUNTEERING

Director of Publications — Rotaract Clubs

2020 – 2021

- Served as Director of Publications, contributing to publication and communication activities within the Rotaract Clubs.
